

Sun cream

It is the responsibility of parents/guardians to supply appropriate sun cream. The child should apply their own sun cream unless written request has been given to Boom Active stating that they would like a Boom Active representative to apply sun cream to the following areas: arms, legs, neck and face. The child should be encouraged to rub in the cream themselves if capable.

We encourage children to wear hats .

We ensure that there are lots of shaded/covered areas accessible in our outside area and adapt our outdoor activities to encourage children to play in these shaded areas.

We ask parents to dress children in clothing that will give them additional protection from the sun i.e. long sleeved t-shirt.

Children are able to access the indoor environment at all times.

We ensure that fresh drinking water is always available to the children and remind the children of the importance of drinking plenty during hot weather and spend time talking to them about sun safety, appropriate to age and understanding.
